**CHANNELS AND ACCESSORIES**

- Suitable to sustain and feed lighting circuits and equipment;
- Small quantities of electric, telephone, data wires and cables, on several industrial and commercial buildings.

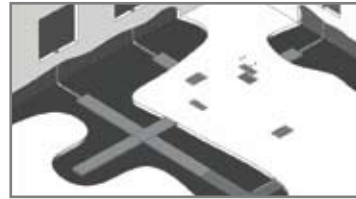

**FLOOR DUCTS**

- Metal ducts for setting up in the floor, manufactured from hot pre galvanized SAE 1010/1020 steel plate;
- Gloves in PVC (Ø 2") fixed with rivets for application in electric, telephonic and data installations.

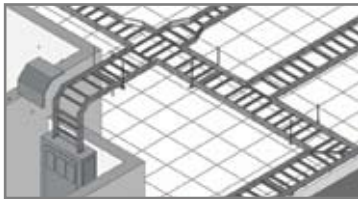

**CABLE TRAYS CHANNEL TYPE AND ACCESSORIES**

- Should be chosen in facilities requiring large capacity to pass distribution circuits or systems, as well as electric power, telephone, data and other ones;
- Good aesthetic appearance, mainly concerning the single channel type, because the wires are not visible.

**APPARENT FLOOR DUCTS**

- Metal ducts for setting up in the floor, manufactured from pre galvanized SAE 1010/1020 steel plate;
- Riveted dividers and apparent covers in the finished floor level for application in electrical installations, telephone and data.

**CABLE LADDER**

- Should be chosen in facilities requiring large capacity to pass distribution circuits or systems, as well as electric power, telephone, data and other ones;
- Complete sustaining system and fastening elements to be used in several industrial and commercial buildings.

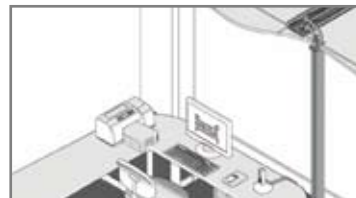

**VERSATILE BASEBOARD**

- Suitable for passing of electric, telephonic and data circuits.

**METALLIC CLAMPS**

- Suitable for support of industrial pipes, conduit and instrumentation tubing.

**METALLIC CONDUCTOR POLES**

- Manufactured in NBR-7008 hot pre galvanized SAE 1010/1020 steel plate for passing of electric, telephonic and data circuits. Can be provided painted (under request).

**QUALITY CERTIFICATIONS**

**NBR ISO 9001:2008**  
certified since 09/10/2009

**NBR ISO 9001:2000**  
certified since 03/10/2003

**NBR ISO 9002/94**  
certified since 01/09/2000
